

International Medical Oncology Training Programme (2+2)

Mission

Excellence in Medical Education and Training

Vision

Training healthcare professionals to become clinicians and leaders to help deliver equitable and cost effective care for global sustainability of healthcare systems.

Welcome Message

Dr. Ramesh Mehta

President, BAPIO

I welcome this excellent BTA initiative in collaboration with University of South Wales and our International Accredited Hospitals, I am confident that excellent faculty at our international accredited

hospitals, will add value to the visiting UK faculty to provide excellent training in Oncology. After 2 years overseas not only will they be exposed to excellent training but will get mentoring and pastoral support from BTA.

Dr. Shashi Balliyan

Managing Director, ClearMedi Healthcare

2+2 program opens a new door for Indian doctors to obtain their post-graduate qualifications and add international exposure to their career. I am very confident that it would enrich the healthcare system of both the

countries and fill an important gap in creating a robust and sustainable healthcare delivery system. A structured training program delivered by top class UK faculty would help to achieve a new milestone in the medical education in India.

It makes the process much smoother and faster for doctors and provides them a softer landing ground in a new country through the excellent pastoral care services provided by BAPIO.

Prof. Parag Singhal

Founder Course Director, Executive Director and Chair of Indo UK Programs

We are delighted to announce the launch of this unique (2 years overseas and 2 years in UK) training programme. This gives new dimension and takes Indo U.K. collaboration to a new level. This programme

provides a great opportunity for doctors to receive high quality training in Oncology by Indian and U.K. faculty and help both the countries.

BAPIO training academy has developed a robust system to ensure monitoring of the quality of learning. This will create a new generation of Oncology specialists who have acquired all the necessary skills. This Training programme will help deliver much needed training in India and help to achieve and expand the vision of having proper Oncology services in India.

In addition to clinical training, our programme offers opportunities to undertake quality improvement and research projects supported by international faculty. This will also encourage the publication in reputed journals.

Dr. Shashank Vikram

Consul General of India, Birmingham

India and UK is an unbeatable combination in Healthcare. This mutually beneficial BTA initiative of Indo-UK for Postgraduate doctors will be extremely conducive to the medical professionals of both the countries for enhancing their skills. Similar to the other programmes initiated by BARD training academy, this course will also help in strengthening healthcare bridges and will deepen the collaboration in healthcare services especially when COVID-19 pandemic has brought healthcare to center stage, and the need for collaborations has been realized by all stakeholders more than ever before. Even in this unprecedented crisis the India-UK healthcare partnership has proven to be beneficial to all humanity, as is evident by Oxford-AstraZeneca-Serum Institute of India vaccine, which today through the 'Vaccine Maitre initiative of the Government of India has brought help and solace to countries around the world. My heartiest wishes to BAPID training academy for this programme which I am sure will provide both the economies a high-quality, longer-term, value-added collaborations of enduring benefit.

Prof. Dame Parveen Kumar

Professor Emeritus, Barts and the London School of Medicine

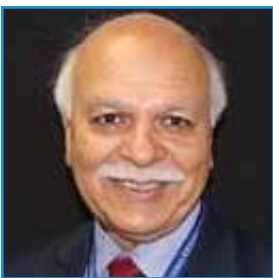

2+2 is a fantastic initiative that will benefit both the young doctors in training and also the NHS. It fills a much needed and an important gap and I am delighted to be part of it.

Prof. Martin Steggall

PVC University of South Wales

We are delighted to be welcoming our clinical colleagues from India, and look forward to continuing this international collaboration in partnership with BAPID. While hosting the visitors, the University of South Wales (USW) is pleased to be able to offer our facilities and expertise to support their educational development.

Prof. Davinder Sandhu

Chair of Quality Assurance

This is a unique opportunity to train professionally overseas (2 years) and in the UK (2 years) in Medical Training, Leadership and Research gaining globally recognized qualifications through the membership/fellowship and gain a MBA in Healthcare and Leadership.

International Medical Oncology Training Programme 2+2 MRCP

1

International Accredited Hospitals 2 Years Training in Medical Oncology by UK and overseas faculty, supporting preparation for MRCP Part1

Start Modules for MSc in Oncology from University of South Wales

3

2 Years Training in UK Hospitals with support for education and pastoral care, 180 Credits in UK for MSc in Oncology, Pass MRCP (UK)

4

Completion of training, Ready to be able to go back to India with MRCP and MSc in Oncology

Pathway For MRCP and MSc in Oncology

- Training delivered overseas and in UK on the basis of of MRCP UK curriculum.
- Candidates enrolled for the MSc in Oncology from USW.

India/Overseas

Year 1

- Clinical training delivered by local and global faculty (overseas faculty visiting India 4 times in a year)
- Enrolment in the Msc in Oncology (MHCL)
- MRCP Primary Examination and related preparation
- Preparation for English Language Proficiency Test (IELTS/OET)
- Clinical Audits - Introduction and Methodology
- Focus on Work Life Balance and Community development programme

Year 2

- Clinical Audits - Application and real time audits
- Focus on Work Life Balance and Community Development Programmes
- Candidates to complete their MRCP Part I

UK (Year 3-4)

- 2 years in UK Hospitals in Secondary Care
- Support for passing MRCP (UK) and Msc in Oncology (USW)

Roles of Involved Institutions

International Accredited Hospitals

- The International accredited hospitals will be the lead organisation for 2+2 programme in India and will be responsible for the first 2 years of training and employment.
- The Hospital will liaise with USW and ClearMedi in UK and look after visiting UK trainers including their travel, lodging and boarding.

University of South Wales

- This University will be the UK organisation participating in delivering MSc in Oncology training as part of this programme.

BAPIO Training Academy (BTA)

- BTA will be coordinating this programme and work as a link between India and UK.
- It will also be responsible for creating a UK visiting faculty and the UK consortium of General Hospitals.
- It will coordinate with the faculty visits to India and organise UK induction and mentoring.
- It will provide pastoral care to ensure the wellbeing of Indian doctors whilst in the UK.
- It is anticipated that 2 UK trainers will go out for 1 week's teaching every 3 months.

- These trainers will be rotated according to availability and content requirement so that any one trainer may go out once every 2 years.

Program Quality Assurance

- 360-degree feedback and real time intervention will be undertaken to safeguard the standard of the 2 +2 programme.
- The programme overseas and in the UK will be closely monitored and audited by experts deputed by the BTA.

Responsibilities of the UK Trusts

- Full support for planned Medical Oncology training.

BAPIO Training Academy will support all trainees with their placement in the NHS hospitals subject to achievement of desired clinical and generic competencies which includes acquiring a set of skills, knowledge and attitude needed to work in the NHS and availability of vacant positions in the NHS.
